

Press Release /// Monday 24<sup>th</sup> of April, 2017

## DIGIDIA, Norkring and TC Connect market leader for DAB tunnel break-in in Norway

**DIGIDIA** has won together with Norkring and TC Connect another 2 major contracts for DAB tunnel break-in in Norway. The delivery is for **20 DAB break-in systems to cover around 30 tunnels** in the Western and Northern region of Norway. These contracts finalize the DAB tunnel roll out. In total **214 tunnels** are equipped with DIGIDIA products and bring our market share in Norway to over 55%.

### ABOUT the DAB BI 2.0 DAB Tunnel Break-in product:

- Simultaneous multi-ensemble management for up to 4 ensembles
- SFN capability, synchronisation with GPS antenna signal
- Automatic Following of dynamic multiplex reconfigurations of DAB ensembles
- Unlimited number of encoders
- Compact: 1 box (483x350x177mm)
- Straight forward easy to use design with user friendly GUIs
- Remote control, maintenance and monitoring

### “ Pascal Olivier, DIGIDIA's CEO says:

DIGIDIA's turnover and profits are on a historic high in 2016/2017. Thanks to the excellent cooperation with NORKRING and TC Connect we won together in a very competitive and difficult environment. We are proud that 2 leading high tech companies in Europe's Number 1 DAB country have chosen DIGIDIA's technology and know how. Our software defined radio approach convinces more and more customers. This is a strong signal also for the other products of our DAB product line such as encoders, multiplexers, EDI/ETI converters and monitoring equipment based on the same technology. ”

### ///About **DIGIDIA**

DIGIDIA has emerged as one of the leading companies for digital radio equipment in Synchronous FM, DAB and DRM technology. DIGIDIA's systems are installed all over the world and include encoders, multiplexers, IP gate ways, modulators, monitoring systems, professional receivers, tunnel break-in products and specific products and projects based on Software Defined Radio.
