Call for expressions of interest:

Following discussions at the WorldDAB Automotive Event held on 21 June in Munich, WorldDAB is sending out a call for expressions of interest in creating a Working Group on the subject of the use of DAB for transmission of data for TPEG. The objective of this call for expressions of interest is to compile a list of companies who would support the creation of a Working Group.

If formed, the Working Group would set a Terms of Reference and a work plan for the Group covering topics such as;

- Looking into promoting DAB as the transmission platform for TPEG
- The current status of DAB for TPEG
- Supporting governments who have recommended DAB for TPEG
- How to promote DAB for TPEG to the automotive industry including looking into where improvements can be made to promote DAB
- Any other issues arising which are relevant to this Group.

The Working Group's meetings will be held via regular conference calls to move the work forward. There may be opportunities to have physical meetings and these would be scheduled to coincide with other WorldDAB meetings. Depending on the Group, the number of meetings and frequency will be set as the Group decides.

Expressions of interest should be sent by 8 September 2017 by email to [projectoffice@worlddab.org](mailto:projectoffice@worlddab.org).
