

DAB ETSI specifications – Change Log 2020-10

This document provides a high level description of changes made to the DAB ETSI specifications

Specification	Supersedes	Scope of changes
TS 101 756 v2.4.1 2020-08	v2.3.1 2019-11	Table updates and addition of regional text profiles, moved from TS 103 176 Country code tables have been revised, tables 3, 4, 6. Programme type display text has been revised, table 12, and added, tables A.15 to A.20. Annex E (regional profiles) has been added (moved from TS 103 176v2.3.1 Annex I) and with the addition of the Thai regional profile. Annex F has been added to complete starburst glyphs for the 'All Europe' regional profile.
TS 102 818 v3.3.1 2020-08	v3.2.1 2019-06	Provision is added for geographical permissions to be given to streaming (IP) bearers; some additional guidance is provided for logo delivery Clause 5.12 (geolocation element) is revised with an additional attribute and extended description. Clause 9.2.2.2 (DAB document conventions) is updated. Annex B (SPI XSD) has been revised. Annex D.5 (logo delivery) has been added. Annex E.2 (bearer selection) and Annex E.3 (bearer switching) have been revised.
TS 103 176 v2.4.1 2020-08	v2.3.1 2019-11	Regional text profile descriptions are moved to TS 101 756 Annex I (regional profiles) has been made void (i.e. deleted) and the content moved to TS 101 756v2.4.1 Annex E. All references to annex I have been updated to indicate the new location in TS 101 756.
TS 103 461 v1.2.2 2020-10	v1.1.1 2017-08	Support is added for tuned ensemble alarm announcements for all receivers to the minimum requirements and clarification is provided for the text display requirements which now accommodate the place of the regional profiles. There are consequential changes to the core technology testing and there are two additional product tests. These updates reflect changes to the DAB standards base since 2017. Clause 5.10 is revised to include hooks for regional profiles and remove requirements for dynamic label control codes. Clause 5.11 is added to define the alarm announcement requirement. Clause 6.10 is revised to include hooks for regional profiles and the EECC. Clause 6.11 is revised to align the requirements with TS 103 176 and include alarm announcements. Table 9 is revised (FIG 1 labels) and table 9A is added (FIG 2 labels). Table 33 has been deleted (dynamic label control codes), Table 36 (service following) and table 37 (service linking) have been revised to add tests including the ECC. Table 38 has been revised (DAB announcements). Table 40 has been deleted (FM announcements). Clause 7.10 has been added, including a new table 40 (alarm announcements). Clause 8.3.5 (product test 3, dynamic label) has been revised. Clause 8.3.8 (product test 6, alarm announcements) has been added. Clause 8.3.9 (product test 7, display) has been added. Annex A (product test streams) has been revised to describe the new ETI product test files.
