About DAB+ digital radio

DAB+ is the digital radio standard of choice across Europe and Asia Pacific.

Over 57.5 million receivers have been sold worldwide and 57% of the European population are able to receive DAB/DAB+ services.

This year Norway became the first country to switch off national FM services, with Switzerland to begin its digital switchover process in 2020.

Political commitment to DAB+ continues to go from strength to strength particularly in the UK, Germany, Switzerland, Belgium and The Netherlands.

With momentum for DAB+ growing across the rest of Europe and Asia Pacific, now is the time to embrace the opportunity.

About WorldDAB

WorldDAB is the global industry forum responsible for defining and promoting DAB digital radio. By bringing together radio industry professionals, WorldDAB provides knowledge and expertise that helps countries successfully adopt and implement broadcast digital radio.

Our 95-plus members cover 27 countries across the globe and include public and commercial broadcasters, regulators, network providers and manufacturers of receivers, chips, professional equipment and automobiles.
