Connects2 launches SmartDAB – the ‘game changer’ for DAB in your car ...

Connects2 have just launched a new ground-breaking product onto the market called “SmartDAB”. The product is targeted for all vehicles and is controlled via Bluetooth to your smartphone. It has been designed so that it is ‘self-fit’ in less than 1 minute straight out of the box.

The station logo, name, song and artist information is displayed on your phone

Digital music is played through your car stereo via the 3.5 mm jack plug

Slide-show images can be also be displayed if transmitted by the radio station

The key points:

- Listen to digital radio (DAB) through your existing radio
- Works with any vehicle with a 3.5mm Aux-in (other leads are available if you only have AV)
- Controlled via a free app available from App Store and Google Play
- App includes option to save favourite stations
- Supplied with amplified glass mount antenna
- Easy to install, plug and play digital radio solution
- USB port for device charging
