

PRESS RELEASE

18. February 2019

PROJECT “DIGITAL RADIO IN SCHOOLS“

Secondary Vocational School of Electrical Engineering, center of vocational preparation.
Hluboká nad Vltavou

The next lecture about digital broadcasting within the project “Digital radio in schools” will be taking place on the 20th of February 2019 at the Secondary Vocational School of Electrical Engineering, center of vocational preparation in Hluboká nad Vltavou. A two hour lecture focuses on the technical details such as broadcasting antennas, frequencies or the volume of each and every single parts of the digital multiplex. Students will introduce themselves to the advantages of digital broadcasting next to the current or the analog status here and abroad. Broadcasting receivers DAB+ are available and the possibility of witnessing the digital stations live as well.

The project “Digital radio in schools” was brought to you by RTI cz s.r.o. within the support of the media literacy in the Czech Republic. In the form of lectures, presentations and listening to the newest broadcasting platforms DAB+, its goal is to bring the digital broadcasting closer to the future generations in a variety of schools with the deeper technical focus. Within this project a couple of lectures and presentations had already taken place in Prague, Pilsen, Hradec Kralove, Blatna or Pisek. Built on the foudation of these presentations, some of the schools will put the digital broadcasting into the school curriculum.

“I believe, that the project “Digital radio in schools” will positively affect the school lessons and will contribute to the overall media literacy of the future generations” adds Roman Kropáček, the operating executive of RTI cz s.r.o.
