

# Info and press release | first DAB+ radio coverage in multi-storey car park at Casino-Palace Lucerne.

## **The first multi-storey car park in Switzerland with complete DAB+ radio coverage and a high-quality audio system.**

The Casino-Palace multi-storey car park is in a prominent location in Lucerne – directly on the lake between the casino and the 5-star Grand Hotel Mandarin Oriental (formerly The Palace). It goes without saying that car park guests have very high expectations in terms of comfort and security.

## **Real added value for guests.**

In order to remain one of the most innovative car parks in Switzerland, the management of the Casino-Palace car park decided to offer guests real added value with a high-quality audio system and comprehensive DAB+ radio reception.

## **More comfort. More security.**

Following a comprehensive evaluation and an installation phase lasting several weeks, car park guests are now offered top-class convenience. While in most car parks the radio goes silent shortly after passing through the barrier, visitors to the Casino Palace car park can now enjoy undisturbed and crystal-clear DAB+ reception right into the furthest corner on all five underground parking levels.

In addition to this service, the installed audio system allows you to enjoy soft background music of the highest quality when you get out of your car. This not only increases comfort, but also the perceived safety of guests, as announcements can be communicated crystal-clear throughout the hotel at all times.

### **Good to know. / In a nutshell. / Background.**

In many multi-storey car parks, it is dark and narrow as soon as you enter. The radio often goes silent as soon as you reach the barrier. Guests in the Casino-Palace Luzern car park are spared this experience. Thanks to DAB repeaters, reception is not interrupted in the middle of the news or during your favourite song. The system is also a safety feature: if the radio only works again after leaving the car park, there is a high risk of distraction and accidents.

**“We have always offered our car park guests a first-class service: plenty of space, lots of light and a comprehensive sense of security are a matter of course for us. The numerous positive feedbacks from our visitors confirm that the installation of the two new systems was the right decision. We are proud to continue to be one of the most innovative car parks in Switzerland.”**

Antonio Hoffmann

Car park operations manager  
Casino-Palace Lucerne car park

## **The audio and DAB+ repeater systems were realised by:**

*Planning and execution of the installation:*

Architektur Elektronik GmbH  
[www.architekturelektronik.ch](http://www.architekturelektronik.ch)

*Manufacturer of the DAB repeater system:*

Sumatronic AG
